Dear Friends,

The European Federation for Medical Informatics (EFMI) and the Spanish Society of Health Informatics (SEIS), invite you to the Medical Informatics Europe Conference **MIE2015**, which will be held from **27 to 29 May 2015** in Madrid, Spain.

The theme of MIE2015 is **“Digital healthcare empowering Europeans”**; addressing a range of important aspects, like the impact of new approaches and IT tools in day-to-day life affecting the citizens.

**Book 27-29 May 2015 in your calendar for a special event - EFMI MIE2015 and join us in Madrid!**

For MIE 2015 we invite participants to submit contribution on a broad range of topics, sharing your latest achievements in biomedical and health informatics. The sessions of the conference will be opened with excellent keynote speakers presenting new trends and approaches in Europe. We expect papers on the role of digital healthcare in pursuing benefits in terms of interdisciplinary collaboration to achieve care and treatment processes supporting quality of life for citizens, healthcare providers, and the society. The program will contain presentations of **papers, posters, workshops, panels**, and interactive demos related to the topics:

- Digitized public and private healthcare enterprise
- Advanced analytics and Big Data in healthcare
- Digital networks and services
- Digital healthcare strategies
- Traditional digital channels vs. social media
- Lifestyle apps supporting healthy living
- Mobile healthcare services
- Collaborative medicine
- New tools in healthcare education
- Internet of things customized for healthcare applications
- Multimodal interfaces in healthcare
- Ambient assisted living and wellbeing
- Digital health improving management of resources in healthcare
- Translation and adoption
- Modelling for the digital patient
- Clinical user interfaces
- Genetic data and phenomics
- Sustainable and integrated citizen-centred care

Presented papers and posters will be indexed in Medline and considered for Thomson Reuter indexing as previous MIEs and STCs as EFMI events.

The event will take place in the splendid city of Madrid, Spain, meeting old and new friends in a relaxed atmosphere, enjoying communication with peers, and good food. The Local Organizing Committee selected an excellent location for the conference with modern facilities and all the details for a pleasant stay of the participants. Besides the scientific content there will be several possibilities for exploring history and present characteristics of the hosting city and surroundings in a friendly environment.

With kind regards,
European Federation for Medical Informatics and Spanish Society of Health Informatics
